## Spring 2025 – First Moves And Next Steps

June 2025

### Post-Capitalism Party – First Moves

In response to the inability of either Democrats or Republicans to effectively help common citizens, the Post-Capitalism Party has been created and proposes the following: political emphasis on (restoring sanity to the federal government) consumer protection, insurance reform, worker rights, and immigration reform.

An exploratory LLC has been formed. A website with debate area has been set up. Social media accounts on major platforms have been established. Press releases will be distributed as the process continues. The public is now welcome to participate, with a grand opening expected for July 4.

There is no cost to participate. When appropriate a fundraiser will be held to retain a legal team for the purpose of complying with US election law and all fifty states' ballot requirements.

### Post-Capitalism Party – Next Steps

Now that the organization has been set up priorities will shift to filling in the debate forums with best practices, and then networking/marketing to build momentum.

A general outline is in place for the first year:

1. Rally initial public support
2. Hire an attorney
3. Certify delegates for the first advisory council
4. Vote to adopt tenets of party
5. Certify first board
6. Invite independent candidates
7. Invite ally groups
8. Hash best practices
9. Promote laws that protect consumers
10. Promote candidates that protect consumers

###
