Reasonable people seeking reasonable solutions.

Post-Capitalism Party – Introduction

Reasonable People Seeking Reasonable Solutions

May 2025

The *Post-Capitalism Party* is a new political organization whose purpose is promoting wealth for the many as well as retaining preexisting wealth. The 1% must give back to sustain a base of society.

When this concept began in January we expected our platform to lean heavily on economic matters with emphasis on civil issues, hence the name *Post-Capitalism Party*. However as events have unfolded in early 2025, a full-blown Constitutional crisis requires immediate attention. Therefore our initial platform has taken a bit of a sharp turn as nobody could have imagined what transpired this spring.

We present:

The Post-Capitalism Party

www.postcapitalismparty.org

The world is a quarter of the way through the 21st century. There's no excuse for the state of America (and elsewhere): too much violence, too much greed, too much hate. Too many people are hurting while the 1% play 3d chess and live opulently. Capitalism has provided the world with valuable innovations however the scales have tipped. With AI, technology/automation, and monopolies, people are squeezed.

PCP understands the need for personal wealth, fair markets, national unity, helping allies, and a strong national defense. PCP understands the need for preservation of the principles of our democracy.

One organization can't be all things to all people. We aim to attract the best ideas from all sources.

Our Tenets

Consumer Protection – Insurance(s), utilities, rentals, retail, services, apps, one-sided T/Cs, refunds.

Worker Protection – Job descriptions, disingenuous ads, fair pay, fair play.

Ethics – Treat others as you want to be treated.

Sustainability – Somehow, we must work together to create long term solutions for earth and its people.

Learning – Value personal growth, and higher learning in all forms while not excluding free thought.

National Issues – Pro Bill of Rights, health, streamlined immigration, human rights over gov't rights.

Geopolitics – No land-grabs, yes to strong military, fair trade. Roll back tariffs. Oppose genocide.
